

About the job

About The Role:

We are looking for a skilled and motivated Frontend Web Engineer to join our engineering team. In this role, you will be responsible for building high-performance, scalable, and user-friendly web applications and portals. You will collaborate closely with designers, backend engineers, and product managers to deliver exceptional digital experiences.

What you'll be Responsible for

- Design, develop, and maintain responsive web applications and enterprise portals using modern frontend technology.
- Build reusable, modular UI components and maintain shared component libraries
- Collaborate with UX/UI designers to translate wireframes and prototypes into polished, pixel-perfect interfaces
- Work with backend teams to integrate RESTful APIs and GraphQL services
- Optimize application performance for speed, accessibility, and cross-browser compatibility
- Participate in code reviews, providing and receiving constructive feedback to maintain high code quality
- Stay current with emerging frontend trends, AI-powered developer tools, and best practices, and advocate for their adoption where appropriate
- Contribute to technical discussions, architecture decisions, and sprint planning
- Write unit and integration tests to ensure code reliability and maintainability
- Identify and resolve performance bottlenecks, bugs, and UX issues proactively

.

What should We look in you?

- 4 to 6 years of professional experience in frontend web development
- Strong proficiency in React.js — hooks, context, state management (Redux / Zustand / Recoil)
- Strong proficiency in Vue.js — Composition API, Vuex/Pinia, Vue Route
- Good working familiarity with Next.js — SSR, SSG, file-based routing, and API route
- Solid understanding of web fundamentals: HTML5, CSS3, JavaScript (ES6+), and browser API

- Experience building and delivering web applications or portals at production scale
- Familiarity with RESTful APIs and/or GraphQL integration
- Proficiency with version control using Git and collaborative workflows (PRs, branching strategie
- Experience with build tools such as Vite, Webpack.
- Strong problem-solving skills with a structured, analytical approach to debugging and architectur
- Understanding and awareness of AI-powered tools (e.g., GitHub Copilot, AI-assisted code review, LLM integrations) and their application in modern development workflow

Good to have:

- Experience with TypeScript
- Familiarity with testing frameworks such as Jest, Vitest, React Testing Library
- Exposure to CI/CD pipelines and DevOps practice
- Knowledge of web accessibility standards (WCAG 2.1).
- Experience integrating or building features powered by AI/LLM APIs
- Familiarity with design systems and tools like Figma or Storybook
